INFORMED CONSENT FORM

Patient Name: _____ **Date:** _____

1. GENERAL

Antibiotics, analgesia, local anesthetic and other medications can cause allergic reactions causing redness and swelling of tissues, numbness of indefinite duration, pain, vomiting, and/or anaphylactic shock. Taking certain antibiotics can interfere with the effectiveness of oral contraceptives. Administration of local anesthetic or exertion of the jaw during the dental procedure can cause pain and/or restrictive movement in the temporomandibular joint and surrounding muscle. I have read and understand the treatments and terms listed above. Initial/Date _____/_____

2. ANESTHESIA

The administration and monitoring of general anesthesia may vary depending on the type of procedure, type of practitioner, the age and health of the patient and the setting in which anesthesia is provided. Risks may vary with each situation. You are encouraged to explore all options available to you and/or your child and consult with a dentist or pediatrician. I have read and understand the treatment and terms listed. Initial/Date _____/_____

3. CHANGES IN TREATMENT PLAN

During treatment it may be necessary to change or add procedures because of conditions found while working on the teeth that were not discovered during examination; for example root canal therapy following routine restorative procedures or crowns. Therefore, fees can only be estimated and are subject to modification depending on unforeseen or undiagnosable circumstances that may arise during the course of the treatment. I have read and understand the treatment and terms listed above and give permission to the Dentist to make any changes necessary. Initial/Date _____/_____

4. CROWNS, BRIDGES AND CAPS

Conditions that require crowns to be made may also require a root canal treatment for their resolution. This sometimes becomes apparent after the crown is placed. I may be wearing temporary crowns or permanent crowns with temporary cement which may come off easily and must be careful to ensure they are kept on until the permanent crowns are permanently cemented. It is my responsibility to return for permanent cementation within 45 days of the tooth preparation. Excessive delays may allow tooth movement which may necessitate a remake of the crown, bridge or cap. There will be additional charges for remakes due to my delaying permanent cementation. Sometimes it is not possible to match the color of natural teeth exactly with artificial teeth. The final opportunity to make changes in my crown, bridge, or cap (shape, size, fit and color) will be before permanent cementation. I have read and understand the treatment and terms listed above. Initial/Date _____/_____

5. DENTURES

Wearing dentures can be difficult. Sores spots, altered speech and difficulty eating are common problems. Immediate denture placement after extractions may be painful. Immediate dentures may require considerable adjusting and several relines. A permanent reline will be needed later and is not included in the denture fee. It is my responsibility to return for delivery and failure to do so may result in poorly fitting dentures. If a remake is required due to my delay of more than 30 days, there will be additional charges. I have read and understand the treatment and terms listed. Initial/Date _____/_____

6. ENDODONTIC TREATMENT (ROOT CANAL)

Root canal therapy usually takes several appointments for completion. I must return for all appointments to complete my treatment. There is no guarantee that root canal treatment will save the tooth. Complications can occur and occasionally root canal filling material may extend through the tooth, which does not necessarily affect the success of the treatment. Endodontic files and reamers are very fine instruments and stresses vented in their manufacture can cause them to separate during use. Sometimes additional surgical procedures may be necessary following a root canal treatment (apicoectomy). As a rule, a crown will be necessary in order to prevent the tooth from fracturing. The tooth may be lost in spite of all effort to save it. I have read and understand the treatment and terms listed above. Initial/Date _____/_____

7. FILLINGS

Care must be exercised in chewing on fillings during the first 24 hours to avoid breakage. A more serious extensive filling (than originally diagnosed) may be required due to additional decay. Significant sensitivity is a common after-effect on newly places fillings. I have read and understand the treatment and terms listed above. Initial/Date _____/_____

8. PERIODONTAL LOSS (TISSUE AND BONE)

Periodontal disease is a serious condition, causing gum and bone inflammation or loss that can lead to the loss of my teeth. Alternative treatment plans have been explained to me, including gum surgery and/or extractions. Undertaking any dental procedures may have a future adverse effect on my periodontal condition by complicating oral hygiene procedures. I have read and understand the treatments and terms listed. Initial/Date _____/_____

9. RADIOGRAPHS

Dentist requires the use of radiographs to properly diagnose my dental treatment. Radiographs will be used as a record of my care and may be used with my given name and sent to my insurance carrier, other Dentists, and for educational purposes, demonstration and other lawful purposes. I have read and understand the treatment and terms listed. Initial/Date _____/_____

10. PHOTOS

The Dentist and staff may take photographs, intra-oral slides, and/or videos of my face, jaws and teeth. The photographs, intraoral slides, and/or videos will be used as a record of my care, and may be used without my given name or with a fictitious name for educational purposes, in demonstrations, professional publications and any other lawful purpose. I release and forever discharge Sedation and Implant Dentistry Irvine from any claim, demands or liability on account of such use or for the quality of the reproduction of the image. I have read and understand the treatments and terms listed. Initial/Date _____/_____

11. REMOVAL OF TEETH

Alternatives to removal have been explained to me (root canal, crowns, periodontal surgery, etc.) and I authorize the Dentist to remove the following teeth _____ and any other necessary for reasons in paragraph #3. Removing the teeth does not always remove all of the infection, if present, and it may be necessary for further treatment. The risks involved in having teeth removed can include pain, swelling, spread of infection, bone fracture, dry socket, loss of feeling in my teeth, lips, tongue and surrounding tissues (paresthesia) that can last for an indefinite period of time. I may need further treatment by a specialist if complications arise during or following treatment, the cost of which is my responsibility. I have read and understand the treatment and terms listed above. Initial/Date _____/_____

FINANCIAL POLICY

We are committed to providing you with the best possible dental care. Your clear understanding of our Financial Policy is important to our professional relationship. We are pleased to discuss professional fees with you at any time. Please ask if you have any questions.

All Patients must complete our "Patient Information Form" before seeing the doctor.

For all emergency (same day) appointments, payment is due in full on the day of service.

We accept cash, local checks with a bank guarantee card, Visa, MasterCard, Discover, and American Express.

For your future appointments, payments are due in advance of your treatment to reserve the doctor's time. For minor patients, his/her parent(s) or guardian(s) are responsible for any account balance.

For patients with insurance, we are not contracted with any insurance company. We will help you receive the maximum benefits by assisting in submitting insurance claims. Payments will be directly sent to the patient. We cannot guarantee reimbursement from your insurance company.

Insurance is a contract between you and your insurance company. We file insurance claims as a courtesy to our patients. We will not become involved in disputes between you and your insurance company regarding deductibles, co-payments, covered charges, secondary insurance, pre-authorizations, etc., other than to supply factual information as necessary. You are responsible for the timely payment of your account.

If for any reason you must cancel or reschedule an appointment, you MUST notify the office two days (48 HRS) in advance. Failure to do so will result in charges for the time you reserved. These charges will be 25% (minimum \$50) of the procedure amount agreed upon.

I acknowledge and agree to pay reasonable collection fees attorney fees and court cost incurred in collection of my overdue account. I have read, understand and agree with the above Financial Policy.

DENTAL MATERIALS FACT SHEET

I, _____, acknowledge that I have
Print Patient Name

received a copy of the Dental Materials Fact Sheet Adopted by the board on October 17, 2001.

Patient Name

Date

Patient Signature

As required by Chapter 801, Statutes of 1992, the Dental Board of California has prepared this fact sheet to summarize information on the most frequently used restorative dental materials. Information on this fact sheet is intended to encourage discussion between the patient and dentist regarding the selection of dental materials best suited for the patient's dental needs. It is not intended to be a complete guide to dental materials science.

The most frequently used materials in restorative dentistry are amalgam, composite resin, glass ionomer cement, resin-ionomer cement, porcelain (ceramic), porcelain (fused – to metal), gold alloys (noble), and nickel or cobalt – chrome (base-metal) alloys. Each material has its own advantages and disadvantages, benefits and risks. These and other relevant factors are compared in the attached matrix titled Comparisons of Restorative Dental Materials. A Glossary of Terms is also attached to assist the reader in understanding the terms used. The statements made are supported by relevant, credible dental research published mainly between 1993-2001. In some cases, where contemporary research is sparse, we have indicated our best perceptions based upon information that pre-dated 1993. The reader should be aware that the outcome of dental treatment or durability of a restoration is not solely a function of the material from which the restoration was made. The durability of any restoration is influenced by the dentist's technique when placing the restoration, the ancillary materials used in the procedure, and the patient's cooperation during the procedure. Following restoration of teeth, the longevity of the restoration will be strongly influenced by the patient's compliance with dental hygiene and home care; their diet and chewing habits; their regular office visits to allow maintenance of the materials, detection of decay and periodontal disease. It is the goal of the Sedation and Implant Dentistry Irvine to provide the best long-term treatment for our patients using the best materials available.
